PROFILE

Information Technology student with hands-on experience in **Power BI, SQL, Python, Advanced Excel**, and **web technologies** through academic and personal projects. Passionate about learning new technologies, solving problems, and building practical solutions. Seeking internship opportunities to apply technical skills while gaining real-world industry experience.

PROJECTS

Blinkit Sales Analytics Dashboard

Power BI / Python

- Designed an end-to-end **Power BI dashboard** analyzing **\$1.20M in total sales** across **8,523 items** for India's leading quick-commerce platform.
- Visualized key KPIs — Total Sales, Average Rating (3.9), Item Count, and Average Sales (\$141) using interactive card visuals.
- Built comparative fat-content analysis (Low Fat vs Regular) by outlet tier across 16 product categories including Fruits, Snacks, Household, and Frozen Foods.
- Developed outlet performance table with conditional formatting covering Supermarket Type1/2/3 and Grocery Stores — tracking sales, item count, and visibility.
- Incorporated outlet establishment trend line (2010–2022) and size/location distribution charts using donut and stacked bar visuals.

Spotify Listening Behavior Dashboard

Power BI / Python

- Built a multi-section dashboard analyzing **12,724 tracks**, **3,835 artists**, and **7,381 albums** from personal Spotify streaming data (2015–2024).
- Added platform slicers (Android, iOS, Mac, Web Player, Windows) and behavior filters (Shuffled, Skipped) for dynamic, user-level analysis.
- Developed Year-over-Year comparison metrics: Tracks –10.42%, Artists –24.43%, Albums –20.19% vs prior year.
- Visualized weekday vs weekend listening patterns using donut and area charts; designed Top 5 rankings for Albums, Artists, and Tracks.
- Applied a custom dark theme (#1A1A1A) with Spotify green branding for visual consistency and professional presentation.
